

How to Glitch in Team Fortress in Starve.io

By: Glitch Teacher (Piggy-Pump!)

Abstract: In this pdf, you will find how to glitch in Team Fortress in Starve.io on both teams, red and blue. All information taught by me is 100% true and legit, so please trust me. However, there are multiple ways to execute a glitch, thus, you may find something I do different from you.

On Blue Team:

Setup:

- Get builder
- Mine 20 stone
- Craft a wall and a door
- Get to your team's checkpoint
- Turn on grid mode by pressing g
- Place wall next to center wall
- Place door on either side (your choice)
- Here's what it looks like:

Note: You can also use 2 doors if you want.

The Actual Glitching

- To glitch, you must use your contraption, so get in it:

- Then hold down a and press w, then, s, then, w, then, s back and forth every ½ sec.
 - Make sure not to spam
 - And trill slowly and keep it legato
- Once you are in, you cannot come back out. That's why blue team is not my preferred team.

- Tips and Tricks:
 - Try to get an archer in for defense and attack. (They can shoot while you repair and fix walls)
 - Obviously, you're going to need towers for your archers. To prevent other archers from firing in, you need to prepare roofs as well.
- Here is my completed base:

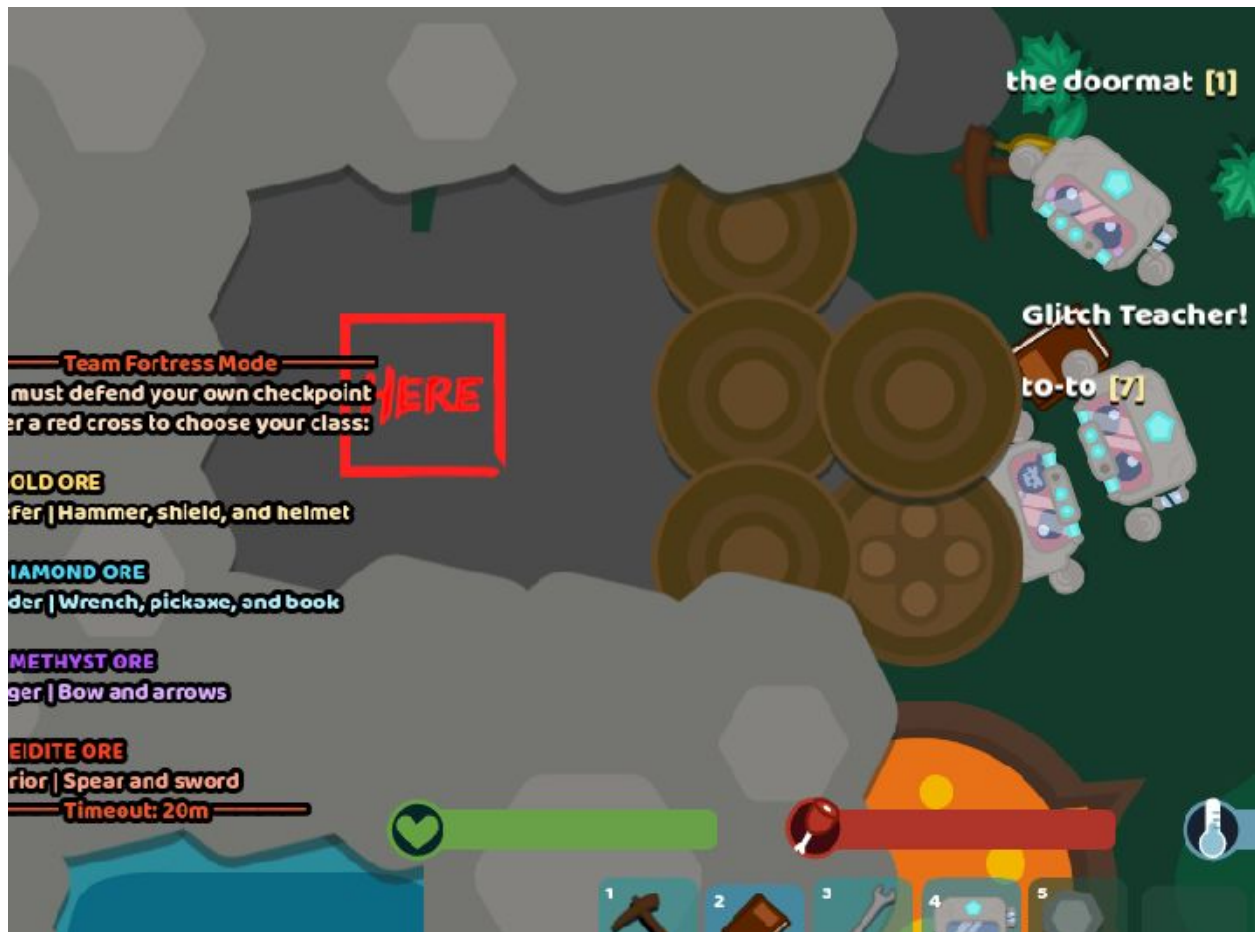

On Red Team:

Setup:

- Get builder
- Mine 20 stone
- Craft a wall and a door
- Get to your team's checkpoint
- Turn on grid mode by pressing g
- Place wall next to center wall
- You **must** place door under the wall or to the left of the wall
- Here's what it looks like:

Note: You can also use 2 doors if you want.

The more complicated glitch:

- Get in your contraption

- Hold w and press a then d then a then d back and forth until you have managed to repel yourself down to the rock. Or your name tag is visible in the hole of the contraption

- Now hold s until your body appears on the left side of the triple wall
 - Then, simply press wa to get out into red team's checkpoint
- The Next Step is to get to the spawns to become ranger, builder, or grefier.
- Get close to the wall

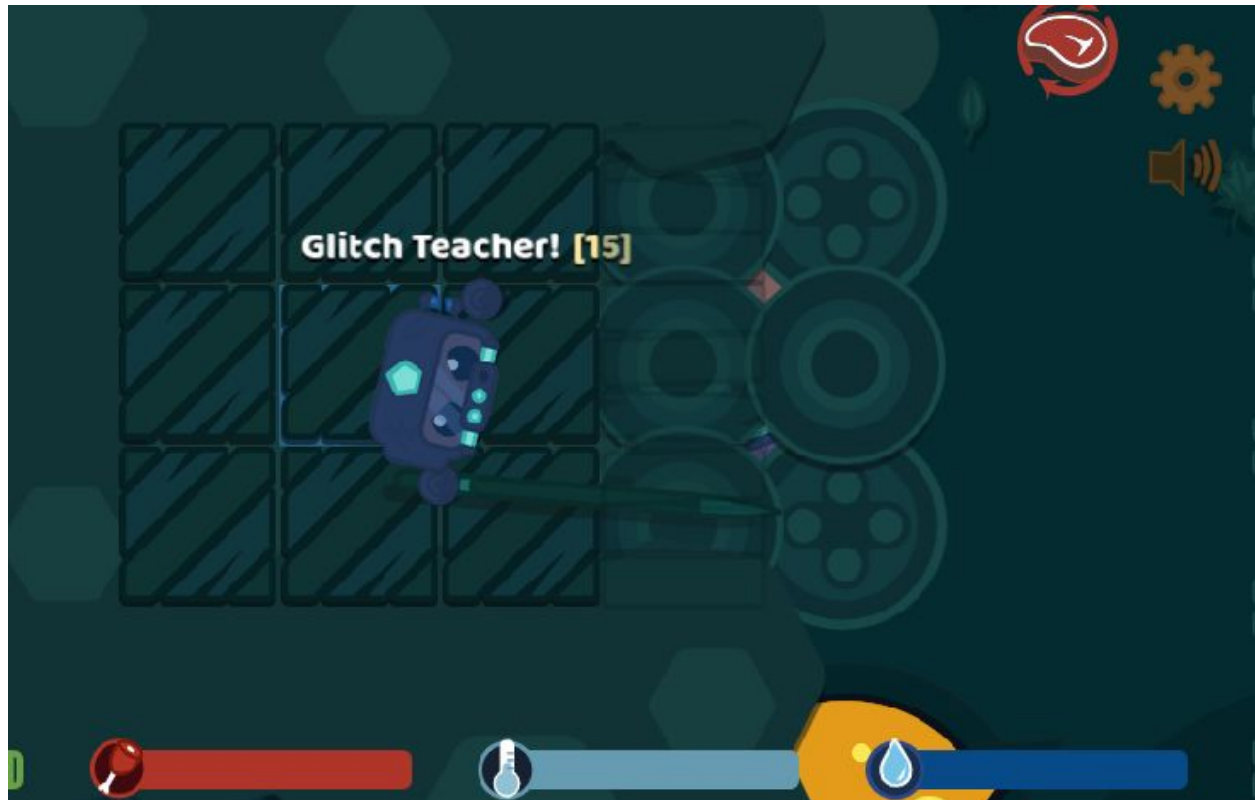

- Press wd once and hold w

- Tips and Tricks
 - You only have enough space to hold 3 sets. Meaning if you are builder, ranger and warrior. You won't have enough space to get the griefer's hammer or shield.
 - Once you take builder you can't take it again, meaning you can only spawn in the game 4 times including the first time you spawn.
 - If you want to base up, then prepare your towers and roofs before you pick up the last set.
 - Since you can't drop items, if you overcommit on getting stone, you can always mine up to the nearest multiple of ten and craft something and place it down
- Here's my final base:
 - I have builder for fixing
 - Ranger for shooting
 - Towers for shooting
 - Roofs for defense against arrows

- Warrior for the spear so I can let others glitch in my contraption

And that's all, hope you share this with others who are desperate for help!
